B. Rudkin	L. Smith	

*Youth
at the
Prow...*

Our young people don't need to look very
far ahead for responsibility nowadays.
Rewards come early in the Midland Bank.

Young men can confidently train to enter branch
management (many will reach it while still in their thirties)
at salaries of at least £1,925 a year with the certainty of
rising to higher—generally very much higher—figures.

There are quite exceptional opportunities for girls, too.

Keen? ambitious? forward-looking? . . . then this
is the career for you. Why not set sail *now*?

Interviews can be arranged either in London or at one of a
number of convenient provincial centres.

Please write first to: The Staff Manager

NATIONAL COAL BOARD

UNIVERSITY SCHOLARSHIPS IN ENGINEERING

£400—£440—£535

The National Coal Board's Scholarships are now worth £400 a year at Provincial Universities, £440 at London University, and £535 at Oxford and Cambridge. There is no means test. Grants are paid in full irrespective of parents' income.

A **UNIVERSITY MINING COURSE** gives a broad foundation in mechanical and electrical engineering as well as in mining, and includes geology and surveying.

THE MINING ENGINEER'S career lies in general management, or as a specialist in, for example, mechanisation, or planning, or method study. He can step on to the management ladder straight after his practical training. The successful man's first sole command, as colliery manager, comes in his early 30's. Output, costs, the deployment of men, machines, materials and money—it's all up to the manager, with the challenge and satisfaction of personal responsibility—then a clear line of promotion right to the top.

100 SCHOLARSHIPS are offered each year. These are mostly in Mining Engineering, but a limited number are also available for Mechanical, Electrical and Chemical Engineering, and Fuel Technology.

STUDENT APPRENTICESHIPS. Boys with at least a pass in Mathematics, one Science and two other subjects in G.C.E. at O level are eligible to apply for Student Apprenticeships as an alternative to University Scholarships. They take a co-ordinated course of practical training and technical education which will equip them for careers leading to supervisory and technical posts in mining, mechanical or electrical engineering. Those who do particularly well may be selected as Engineering Trainees, along with University Graduates, and qualify eventually for technical management.

OTHER CAREERS. There are also good opportunities for advancement for boys with initiative who come straight into the industry from school even if they do not hold a G.C.E. Part-time courses leading to National and other Certificates are available at Technical Colleges, and day release from work, with pay, is given to approved students.

For those interested in Science, there are absorbing and rewarding possibilities at the Board's Research Establishments, and in the coalfields on operational work.

There are, from time to time, training posts for boys of a good educational standard who want to make a career in architecture, civil engineering and accountancy, as well as openings in administrative, personnel, and marketing work.

For further information about the Scholarships, Student Apprenticeships, and other careers in the industry, please write to:—

A career as a CHARTERED ACCOUNTANT offers:

OPPORTUNITY :

From the moment you qualify you can expect to earn between £1,100 and £1,250 a year in the London area depending on your experience and academic ability (commencing salaries might be slightly less in the provinces) and opportunities are then open to you either as a practising accountant or in industry and commerce—many Company Directors start as chartered accountants.

Depending on the level of education you have reached it takes three, four or five years to qualify as a chartered accountant. During this training period you can earn from £250 to £800 per annum.

VARIETY :

Accountancy is not a dull or monotonous profession. Many problems, each requiring a different solution, occur every day and it is often necessary for the chartered accountant and his articled clerks to travel in England and sometimes abroad.

SECURITY :

Chartered accountants are always in demand. When qualified they can be sure of employment and opportunities for advancement whatever the political situation or the state of the business economy.

The booklet "Why not become a Chartered Accountant?" issued by the Institute of Chartered Accountants in England and Wales, tells you (and your father) more. Why not send for a copy?

*To the Secretary, The Institute of Chartered Accountants in England and Wales,
City House, 56/66 Goswell Road, London, E.C.1.
Please send me a copy of "Why not become a Chartered Accountant?"*
